

WICCI COUNCIL NAME (ENVIRONMENT & REFORESTATION COUNCIL, WICCI, KARNATAKA)

**WOMEN'S INDIAN CHAMBER
OF COMMERCE AND INDUSTRY**
www.wicci.in

Council Vision & Mission

The world has several challenges that we'll have to solve in the 21st century. The problems that we face are connected and integrated. Therefore, we believe it necessary to focus on an integrated solution for the challenges that we believe mankind faces nowadays. They are erosion, deforestation, desertification, climate change and water scarcity.

In order to solve these challenges, mankind needs the solutions of thousands and the hard work of millions to implement them. There is no one solution for all these problems, on the contrary, we need an integrated approach of all the available solutions in order to solve the challenges. Our organisation Zielony will focus on reforestation that can help alleviate the challenges.

VISION

Zielony aims at reforestation in manmade deserts – we call this the Tree solution- by developing and implementing the solutions that are helpful for the, welfare of humanity and the environment. We do this because we want to help reduce the concrete jungle and enabling conducive environment by growing trees and restoring lakes by eliminating the hazardous plastic materials. Zielony will take the responsibility to do its utmost to help the implementation of the reforestation to be successful during the 21st century.

Council Vision & Mission

MISSION

Our mission is to work on forest enhancement initiatives, plastic ban and cleaning of lakes and other environmental related issues which hampers the well-being of the mother earth and our environment.

- **Reduce forest clearing and degradation:** To protect and maintain intact forests in more efficient ways, more ecologically by planting trees, or replanting to bring a eco-friendly surroundings in the environment which paves way to green and positive atmosphere.
- **To view tree planting as one part of multifaceted environmental solutions:** To enhance tree cover is one of our motto and to prevent gas emissions driven by human activities, representing more of oxygen by the green cover which paves way to the carbon reductions, by planting more of tress.
- **Balance ecological and social goals:** To acknowledge compete land uses and focus on landscapes with the potential to generate large-scale benefits by planting trees in various forests such as the Bannerghatta forest, Thuralli forest, Jarkaandi forest in Bangalore, where regional planning of tree planting initiatives can lead to three times green cover in and around the forests.
- **Plan, coordinate, and monitor:** Our volunteers and our team members will work to resolve conflicting issues which hampers the environment. Our goal is to ensure maximum effectiveness over the long term by planting trees and ensuring forest restoration.

To be successful, tree-planting initiatives will be implemented by engaging our volunteers and team members to confront and solve the conflicting issues by planting and removing the plastic near the water sources, and other hazardous materials that pollutes not only the land but also the environment. We as an organisation look forward to dedicate and work for the enhancement of the green cover **'GO ECO BY ZEILONY'**

*Welcoming
